

Contents to Volume 40

No. 1, 2

Issue contents

M. Tirronen, M. Partanen, T.O. Heino, T.I. Heino and C. Roos

Analyses of the *Drosophila quit*, *ovarian tumor* and *shut down* mutants in oocyte differentiation using *in situ* hybridisation

113

E.-J. Dekker, M. Pannese, E. Houtzager, E. Boncinelli and A. Durston

Colinearity in the *Xenopus laevis* Hox-2 complex

No. 3

1

3

C.K. Ohno and M. Petkovich

FTZ-F1 β , a novel member of the *Drosophila* nuclear receptor family

13

B. Ferreiro, P. Skoglund, A. Bailey, R. Dorsky and W.A. Harris

XASH1, a *Xenopus* homolog of *achaete-scute* a proneural gene in anterior regions of the vertebrate CNS

25

R. Paro and B. Zink

The *Polycomb* gene is differentially regulated during oogenesis and embryogenesis of *Drosophila melanogaster*

37

G.-J. Liaw and J.A. Lengyel

Control of *tailless* expression by *bicoid*, *dorsal* and synergistically interacting terminal system regulatory elements

47

U. Busse and C. Séguin

Isolation of cDNAs for two closely related members of the axolotl *Wnt* family, *Awt5A* and *Awt5B*, and analysis of their expression during development

63

L.C. Bradley, A. Snape, S. Bhatt and D.G. Wilkinson

The structure and expression of the *Xenopus Krox-20* gene: conserved and divergent patterns of expression in rhombomeres and neural crest

73

J.F. Armstrong, K. Pritchard-Jones, W.A. Bickmore, N.D. Hastie and J.B.L. Bard

The expression of the Wilms' tumour gene, WT1, in the developing mammalian embryo

85

C.W. Ragsdale, Jr., P.B. Gates, D.S. Hill and J.P. Brockes

Delta retinoic acid receptor isoform δ_1 is distinguished by its exceptional N-terminal sequence and abundance in the limb regeneration blastema

99

Issue contents

127

A. Bulfone, H.-J. Kim, L. Puelles, M.H. Porteus, J.F. Grippo and J.L.R. Rubenstein

The mouse *Dlx-2* (*Tes-1*) gene is expressed in spatially restricted domains of the forebrain, face and limbs in midgestation mouse embryos

129

K.A. Wharton, Jr. and S.T. Crews

CNS midline enhancers of the *Drosophila slit* and *Toll* genes

141

B.J. Drucker and M. Goldfarb

Murine FGF-4 gene expression is spatially restricted within embryonic skeletal muscle and other tissues

155

S. Baumgartner and R. Chiquet-Ehrismann

Ten^a, a *Drosophila* gene related to tenascin, shows selective transcript localization

165

S. Shen, P.T. Van der Saag and W. Kruijzer

Dominant negative retinoic acid receptor β

177
